

## MEDIA RELEASE

LogiMAT 2006:

# Seidl + Partner identification solutions ensure controlled flow of materials and goods

Kissing, January 19, 2006 – Seidl + Partner GmbH will be presenting their latest industrial labelling and identification solutions at the LogiMAT 2006 trade fair in Stuttgart, Germany (March 28-30, 2006). This year, visitors have the opportunity to learn more about the established S+P GRAPHIPLAST® adhesive labels and barcode tags, and to gain insight into state-of-the-art, RFID-based inventory management systems. At booth 316 in hall 10, Seidl + Partner will showcase a wide range of customer applications for in-house material logistics and distribution workflows.

S+P GRAPHIPLAST® barcode tags and labels provide for secure identification – of both raw materials and finished goods – with guaranteed traceability during the entire production workflow, from the internal handling of materials or batches to the final distribution. S+P data carriers can be processed by any standard printing system, e.g. thermal transfer, laser and matrix printers. At LogiMat,

Seidl + Partner GmbH will present complete printing solutions for the database-driven creation of labels using ERP solutions by SAP and other leading vendors.

Recent innovations by Seidl + Partner include multifunctional hanging as well as adhesive labels and tags and RFID-based applications for stock and workflow management.
